

Project Information:

Scottsdale Water Tank #42
26602 N. Pima Rd.
Scottsdale, AZ 85262

APN: 212-33-001

Proposed Use:

This application is for new mounted antennas on an already existing water tank, intended to provide cellular service to the people in this area, with minimum visual impact. The related ground equipment will be located inside a 12-foot by 20-foot shelter. The shelter will be painted to match the existing shelter to the south. The paint will be mixed on site during the installation to achieve an exact color match.

Current zoning: **R1-190**

Zoning to North:	R1-190
Zoning to East:	R1-190
Zoning to South:	R1-190
Zoning to West:	R1-190

Narrative:

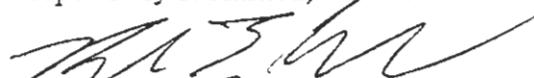

The proposed site is necessary to handle the capacity of wireless phone calls in the area. In addition, this site will incorporate the new E-911 call tracking antennas as mandated by the FCC.

The site will require one technician on a once per month visit after construction for maintenance. The proposed project will not utilize connection to any water system, refuse collection, or sewer system.

The property is located on the northwest corner of Pima Rd. and Jomax Rd. The site is located on the existing water tank. A proposed shelter, thus screening the equipment from both Pima and Jomax, will screen the ground Equipment.

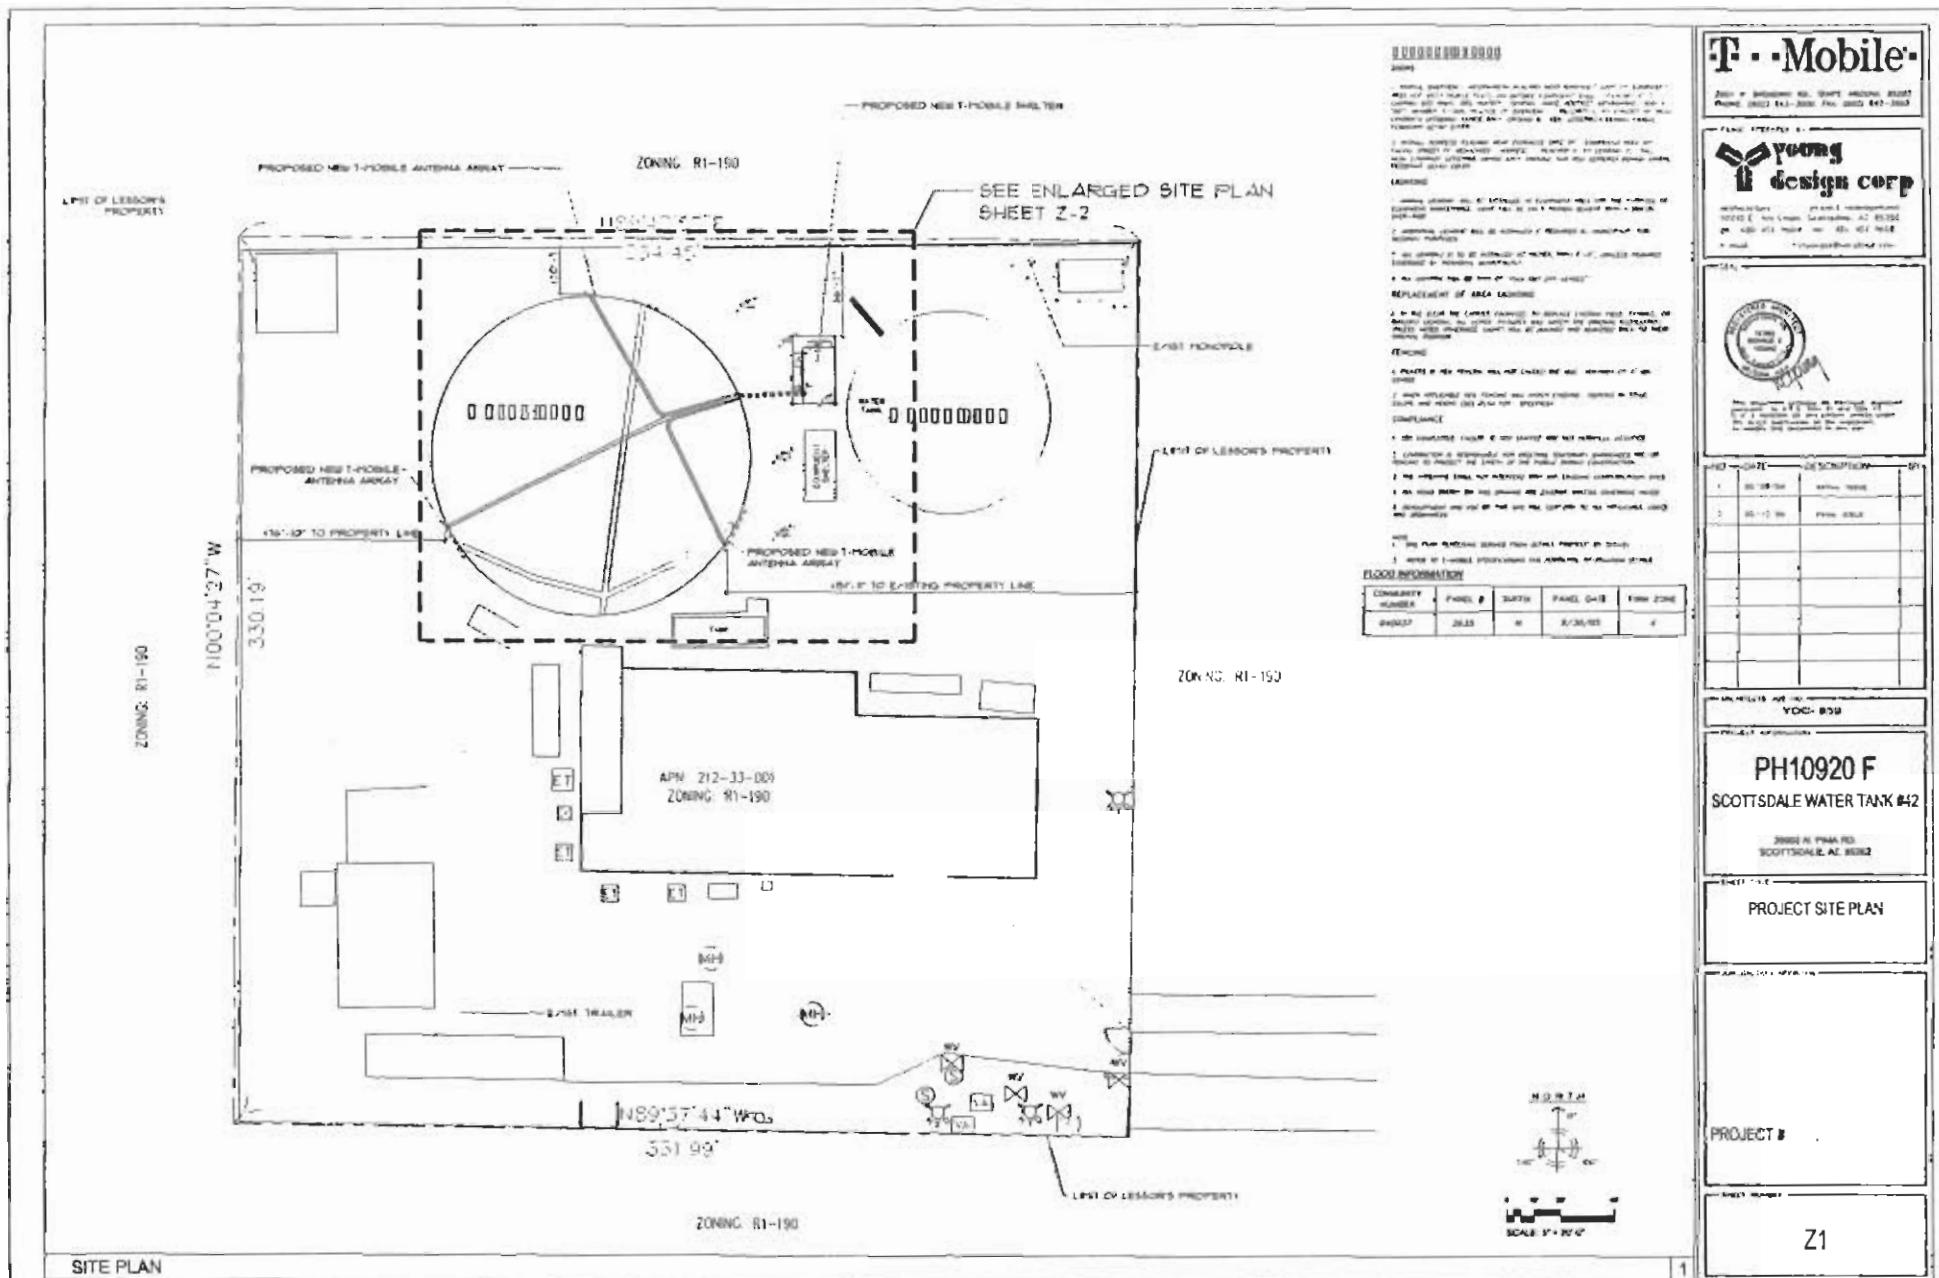

This development will not affect any vehicular or pedestrian patterns. The communication site does not emit any odor, dust, gas, noise, vibration, smoke, heat or glare. The RF emissions from this site are well within FCC guidelines for a digital PCS communication site.

Respectfully submitted,

Rulon Anderson
